
Hill Billy Spare Parts: *Fitting Instructions—Battery Leads*

HB 13

Please read these instructions carefully. Return faulty parts that are under warranty.

1. Cut away the insulation from the positive and negative terminals using a sharp knife.
2. Undo the screws from each terminal and remove the old leads
3. Slide the new 'heat shrink' insulation on to the new battery leads and secure the leads to the battery. Please ensure that the red wire is attached to the red (positive) battery terminal.
4. Slide the insulation completely over the battery terminals and apply heat using a hairdryer, hot air paint stripper or use the steam from a boiling kettle.
